youtube.com/@UtsavMaity0308

PROFILE

First-year B.Tech Computer Science & Engineering student with a strong interest in programming, computer systems, Linux, software development, physics, and emerging technologies. Interested in understanding software and systems at a fundamental level, with a long-term focus on high-performance computing, graphics, physics engines, artificial intelligence, and research-oriented technology.

EDUCATION

Institute of Engineering & Management (IEM)

Bachelor of Technology (B.Tech), Computer Science

Jul 2026 – Present

DAV Schools Network

Grade 5–12 · PCM + Computer · CBSE

Jun 2018 – Jun 2026

Class 10: 84% | Class 12: 80%

TECHNICAL SKILLS

Programming: C, C++, Python

Tools & Technologies: NumPy, MySQL, Git, GCC/G++, VS Code

Systems: Linux/Ubuntu, command-line workflows, debugging

Core Areas: Data Structures & Algorithms, automation, problem solving

Areas of Interest: Systems programming, graphics and rendering, physics engines, AI, software optimization

PROJECTS

Super Calculator

Developed a multifunctional calculator application supporting numerical calculations, expression evaluation, and mathematical graphing.

Technologies: Python, NumPy, Turtle

UNO

Developed a Python implementation of the UNO card game, including randomized gameplay and programmatic game-state management.

Technologies: Python

Personal Automation Scripts

Created scripts to automate repetitive personal tasks and explore practical applications of programming and command-line workflows.

Technologies: Python, Linux

AREAS OF INTEREST

Computer systems · Software development · High-performance computing · Graphics and rendering · Ray tracing · Physics engines
· Artificial intelligence · Algorithms · Linux
